

International size reference: LTC-5PN

ELECTRICAL CHARACTERISTICS

(typical values for cells stored for one year or less, at 25°C)

Nominal capacity 0.55Ah

(At 1.0 mA, +25°C, 2.0V cut off. The capacity restored by the cell varies according to current drain, temperature and cut off voltage.)

Nominal voltage 3.6V

Maximum continuous current 10mA

(For the fresh cell* to get 50% of the nominal capacity at +25°C 2.0V cut off. Higher currents possible, consult EVE.)

Maximum pulse capability: Typical up to 20mA
Rated 1 sec. pulse capability(to 3V) 15mA

(This data is base on the fresh battery* performance, pulse capability varies according to pulse characteristics (frequency and duration), temperature, cell history (storage conditions prior to usage) and the application's acceptable minimum voltage. Fitting the cell with a Lithium-ion Battery Capacitor or a capacitor may be recommended in servere conditions, consult EVE.)

Storage (recommended) +30°C max
 (for more severe condition consult EVE)

Operating temperature range -60°C / +85°C

(Operation at temperature different from ambient may lead to reduced capacity and lower voltage plateau readings.)

Typical weight 6g

*Fresh cell/battery:

Defined as the cell or battery that stored at +25°C max. Within 3 months.

WARNING:

Fire, explosion and severe burn hazard. Do not recharge, crush, disassemble, heat above 100°C, incinerate, or expose contents to water.
 Do not solder directry to the cell, use tabbed cell intead.

EF651620

**Lithium-thionyl Chloride
 (Li-SOCl₂) Battery**

KEY FEATURES

- ✓ High and stable operating voltage
- ✓ High minimum voltage during pulsing
- ✓ Low self discharge rate (less than 1% after 1 year of storage at +25°C)
- ✓ Stainless steel container
- ✓ Hermetic glass-to-metal sealing
- ✓ Non-flammable electrolyte
- ✓ Non-restricted for transport
- ✓ Compliant with IEC 60086-4 Safety standard and EN 60079-11 intrinsic safety standard
- UL Underwriters Laboratories (UL) Component Recognition (File Number MH28717)

MAIN APPLICATIONS

- ✓ Utility metering
- ✓ Alarms and security devices
- ✓ Memory back-up
- ✓ Tracking systems
- ✓ Automotive electronics
- ✓ Professional electronics ... etc.

EF651620

1. Typical discharge profile at +25°C (Median value)

2. Voltage plateau versus Current and Temperature (at mid-discharge)

3. Capacity versus Current and Temperature (2.0V cut off)

4. STORAGE CHARACTERISTICS
